

FATAL INFANTILE CARDIOENCEPHALOMYOPATHY DUE TO CYTOCHROME C OXIDASE DEFICIENCY SCO2 GENE SEQUENCING

Cytochrome c oxidase (COX), also known as Complex IV, is the terminal enzyme of the mitochondrial respiratory chain. Deficiency of this enzyme can have a wide range of effects, from isolated myopathy to severe multisystem disease, with onset from infancy to adulthood. COX deficiency can be caused by mutations in several nuclear-encoded and mitochondrial-encoded genes. When caused by mutations in the *SCO2* gene (OMIM 604272), COX deficiency is associated with fatal infantile cardioencephalomyopathy (OMIM 604377), an autosomal recessive disorder.

Fatal infantile cardioencephalomyopathy is characterized by hypertrophic cardiomyopathy, encephalopathy, lactic acidosis, hypotonia, respiratory distress and/or stridor, developmental delay, spasticity or seizures, and decreased extraocular movements. Muscle biopsy shows COX deficiency and neurogenic changes.

Fatal infantile cardioencephalomyopathy can also present with a phenotype resembling spinal muscular atrophy (SMA), including hypotonia, respiratory distress, and SMA-like changes in the muscle and/or spinal cord (Pronicki, 2010; Salviati, 2002; Tarnopolsky, 2004). Heart involvement is not necessarily present at the onset of the disease.

All patients reported in the literature have been identified as either homozygotes for the common E140K mutation, or compound heterozygotes with E140K and another mutation. Homozygous E140K mutations are reported as having a delayed onset and slower clinical progression (Salviati, 2002).

Testing:

Testing is performed by sequencing the entire coding region (exon 2) and surrounding intronic regions of *SCO2*. This will detect point mutations, small deletions, and small insertions. It will not detect a partial or whole gene deletion or duplication.

Turnaround time: 10 - 14 business days

CPT codes and cost: 81479: \$ 200

BILLING: *We do not bill third party payers (insurance companies)* for samples received from external sources. **The person or institution(e.g., Clinical Lab; Send-out Lab; Physician Office) sending the sample is responsible for full payment of the invoices within 30 days of receipt of the invoice.** If the patient is on Medical assistance, please contact the lab **prior** to sample submission. Direct patient billing will be accepted **only** when a valid credit card form is received with the patient sample.

Facsimile Verification Form

Name of Facility receiving Fax: _____

Name of Physician/Lab receiving Fax: _____

Street Address: _____

City _____ **State:** _____

Fax Number: _____

(to which lab results and /or patient information may be sent)

Phone Number: _____

By signing this Facsimile Verification Form, I validate the accuracy of the above information and assume responsibility for assuring that the Fax machine is in a location which will maintain confidentiality of all reports transmitted by the Molecular Diagnostics Laboratory of the Nemours/Alfred I. duPont Hospital for Children, to the above fax number.

Authorized Contact Person: _____

Signature: _____ **Date:** _____

Title: _____

In our continuing efforts to maintain patient confidentiality, the Molecular Diagnostics Laboratory of the Nemours/Alfred I. duPont Hospital for Children requests you to verify the fax number **only once** from your medical practice or institution and to assure that all faxes regarding patient information are received in a secure location in accordance with HIPAA regulations.

Please complete this Facsimile Verification Form and fax back to 302.651.6795.

If you have any questions regarding this form please contact Susan Kirwin, Assistant Director of The Molecular Diagnostics Laboratory, at 302.651.6777.

This is a confidential document that is being sent from a fax machine in a secure location.

This fax is covered by the Electronic Communications Privacy Act 18 U.S.C. 2510-521. The information contained in this fax is considered privileged, is otherwise confidential and is intended only for the use of the individual or entity named above. Dissemination, distribution, or copying of this communication is strictly prohibited. If you have received this communication in error please notify us immediately by telephone, and return the original message to us at the above address via the U.S. Postal Service.
